

The Mountain Difference for the Vibrant Rhone Varietals

Each block of our remarkable vineyard site was selected with for the sake of the vigor and ripening characteristics of our varietals. Orientation of the sun for intensity and shading is critical for capturing a complete range of aromatics and fruit flavors without losing complexity or structure. Decades of personal wine growing experience and expertise of soil scientists informed our decisions.

- All Soil and Slope data collected by Paul R. Anamosa, Ph. D. for Starfield Vineyards
- All vines are spaced 5' in-row x 8' between-row
- All vines are trellised on a modified VSP system with a 18" T-Cross-Arm to allow for shading of vines along with the vine orientation

Starfield Vineyard Facts

Block	Varietal	Clone	Year Planted	Rootstock	Acreage	Row Orientation	Soil Depth	Avg. Soil pH in Fair Soil	Avg. Slope %
P 1	Syrah	Entav470	2015	3309C	1.79	26° East of North	2-4'+	5.2	10%
P 3	Roussanne	Entav468	2014	3309C	1.47	26° East of North	3'	5.2	20%
P 4	Grenache	Alban	2015	3309C	2.13	26° East of North	3-4'+	5.3	5%
P 5	Mourvèdre	FPS05	2016	3309C	1.56	26° East of North	1-4'+	5.2	5%
P 6	Counoise	FPS01	2015	1103P	0.41	26° East of North	2-4'+	5.1	15%
P 7	Cinsaut	FPS02	2023	1103P	0.26	East-West	4'+	5.1	25%
P 8	Cinsaut	FPS02	2023	1103P	0.52	North-South	4'+	5.1	5%
JR 1A	Viognier	FPS06	2024	1103P	1.29	East-West	2-5'+	5.3	45%
JR 1B	Muscat of Alexandria	FPS02	2014	3309C	1.5	East-West	1-4'+	5.3	45%
JR 1C	Vermentino	FPS04	2017	3309C	1.34	East-West	1-4'+	5.5	40%
JR 1D	Marsanne	Entav574	2014	3309C	1.61	East-West	4'+	5.6	35%
JR 1E	Viognier	Entav642	2014	3309C	1.51	East-West	1-4'	5.6	25%
JR 2	Grenache	FPS06	2015	3309C	2.27	26° East of North	2-3'	5.4	15%
JR 3	Tannat	FPS04	2015	420a	0.74	26° East of North	2-5'+	5.5	20%
